Rule 2

(a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, it has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled.

When by application of Rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:

However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale,

those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description.

However, rice which has been husked, milled, polished, glazed, parboiled or converted (broken rice) remains classified in heading 10.06. Similarly, quinoa from which the pericarp has been wholly or partly removed to separate the saponin, but which has undergone no other process, remains classified in heading 10.08. 2. Sweet corn is not covered by heading 10.05 (Chapter 7). Subheading Note:

1. "Durum wheat" means wheat of the species *Triticum durum* and hybrids derived from the interspecific crossing of *Triticum* wheat which have the same chromosome number (28) as that species. Heading Subheading Description of goods Import duty rate Import duty rate

Notes:

1. (a) Goods (other than radioactive ores) answering to a description in heading 28.44 or 28.45 are to be classified in those headings, and not in any other heading of this Schedule.

(b) Subject to paragraph (a) above, goods answering to a description in heading 28.43, 28.46 or 28.52 are to be classified in those headings, and not in any other heading of this Chapter. 2. Subject to Note 1 above, goods put up in measured doses or in forms or packings for retail sale, which are of a kind falling within two or more of the headings 30.04, 30.05, 30.06, 32.12, 33.03, 33.04, 33.05, 33.06, 33.07, 35.06, 37.07 or 38.08 are to be classified in that one of those headings which is appropriate, and not in any other heading of this Schedule. 3. Goods consisting of two or more separate constituents (whether or not intermingled), put up as a set, some or all of which fall within this Chapter and which are intended to be mixed together to obtain a product of Chapter 6 or 7, are to be classified in the heading appropriate to that product, provided that the constituents are:

(a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used

together without first being repacked;

(b) presented together; and

(c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary to one another. 4. Where a good is described by name or function as falling within one or more headings of Chapter 6 and also within heading 38.27, it is classifiable under the relevant heading according to its name or function rather than under heading 38.27.

Section 28 Inorganic chemicals; organic or inorganic compounds of precious metals, of rare-earth metals, of radioactive elements or of isotopes Notes: 1. Except where the context otherwise requires, the headings of this Section apply only to: (a) Separate chemical elements and separate chemically defined compounds, whether or not containing impurities; (b) The products mentioned in (a) above dissolved in water; (c) The products mentioned in (a) above dissolved in other solvents, provided that the solution constitutes a normal and necessary method of storage or transport solely for reasons of safety or transport and that the solvent does not render the product particularly suitable for a specific use rather than for general use; (d) The products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport; (e) The products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for a specific use rather than for general use. 2. In addition to dithionites and sulphonylates, stabilised with organic substances (heading 28.31), carbonates and peroxocarbonates of inorganic bases (heading 28.36), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 28.37), fulminates, cyanates and thiocyanates of inorganic bases (heading 28.42), organic products included in headings 28.43 to 28.46 and 28.52 and In addition to metal carbides (heading 28.49), only the following carbon compounds are to be classified in this Section: (a) Oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading 28.11); (b) Halides of carbon (heading 28.12); (c) Carbon disulphide (heading 28.13); (d) Thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiaminochromates (Reineckates), and other complex cyanates of inorganic bases (heading 28.42); (e) Hydrogen peroxide, solidified with urea (heading 28.47), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (heading 28.53) other than calcium cyanamide, whether or not pure (Chapter 31). 3.

Subject to Note 1 of Chapter 6, the following are not classified in this Section: (a) Sodium chloride or magnesium oxide, whether or not pure, or other products of Section 5; (b) Organo-inorganic compounds other than those mentioned in Note 2 above; (c) Products mentioned in Note 2, 3, 4 or 5 of Section 31; (d) Inorganic products of a kind used as luminophores (heading 32.06); glass frit and other glass, in the form of powder, granules or flakes (heading 32.07); (e) Artificial graphite (heading 38.01); explosive products put up in cartridges or charges for fire-extinguishers or fire-extinguishing grenades (heading 38.13); ink erasers put up in packings for retail sale (heading 38.24); cultured crystals (other than optical elements) weighing not less than 2.5 g each, of halides of alkali or alkaline-earth metals (heading 38.24); (f) Precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (headings 71.02 to 71.05), or precious metals and precious metal alloys of Section 71; (g) Metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with metal) of Section 15; or (h) Optical elements, for example, of halides of alkali or alkaline-earth metals (heading 90.01). 4. Chemically defined complex acids of which the non-metal acid of Sub-Section 2 and the metal acid of Sub-Section 4 are constituent parts are to be classified in heading 28.11. 5. Goods which are capable of being included in two or more headings of this Part shall be classified in the heading which occurs last in numerical order among those headings. 4.

Any reference to halogenated, sulphonated, nitrated or nitrosated derivatives in headings 29.04 to 29.06, 29.08 to 29.11 and 29.13 to 29.20 includes compound derivatives such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives. Nitro and nitroso groups shall not be taken as ?nitrogen-function? for the purpose of heading 29.29. For the purpose of the ?oxygen function? of headings 29.11, 29.12, 29.14, 29.18 and 29.22, the groups of the respective headings containing characteristic organic oxygen shall be limited to the oxygen functions of headings 29.05 to 29.20. 5. (a) Esters of acid-function organic compounds of Sub-chapters 1 to 7 shall be classified with the organic compound with which they are associated, in the heading which occurs last in numerical order in those Sub-chapters. (b) Esters of ethyl alcohol shall be classified with the corresponding acid-function organic

compounds of Sub-chapters 1 to 7. (c) Subject to Note 1 of Chapter 6 and Note 2 of Part 28: (1) Inorganic salts of organic compounds of Sub-chapters 1 to 10 or of heading 29.42, such as acid-, phenol- or enol-function compounds or organic bases, shall be classified in the heading suitable for the organic compound; (2) Salts formed between organic compounds falling within Sub-chapters 1 to 10 or heading 29.42 shall be classified in the heading which occurs last in numerical order among the headings suitable for the base or acid (including phenol- or enol-function compounds); and (3) Coordination compounds, other than products classified in Sub-chapter 11 or heading 29.41, which consist of a metal carbon bond breaking down into suitable constituent parts, shall be classified in the heading which occurs last in numerical order of Part 29. (d) Metal alcoholates, other than ethanol (heading 29.05), shall be classified under the heading for the corresponding alcohol. (e) Halides of carboxylic acids shall be classified with the corresponding acids. 6. The compounds of headings 29.30 and 29.31 are those organic compounds whose molecules contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or metals (such as sulphur, arsenic or lead) directly combined with carbon atoms. Headings 29.30 (organo-sulphur compounds) and 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives). The atoms of sulphur and halogen, in addition to hydrogen, oxygen and nitrogen, are directly attached to carbon, giving them the nature or character of sulphonated or halogenated derivatives (or compound derivatives). 7.

Headings 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids. These provisions apply only to ring positions derived from the functions or cyclising functions mentioned herein containing hetero-atoms (ring position hetero-atoms). 8. For the purpose of heading 29.37: (a) The term "hormones" includes hormone-releasing or hormone-stimulating factors, hormone-inhibitors, and hormone-antagonists (including anti-hormones); (b) The expression "used primarily as hormones" applies not only to hormone derivatives and structural analogues used primarily for hormonal effects, but also to derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading. Subheading Notes: 1. Within any one heading of this Part, derivatives of a chemical compound (or group of chemical compounds) shall be classified in the subheading for that compound (or group of compounds) unless there is a subheading which more specifically directs to them or there is a subheading for "other". 2. Note 3 of Part 29 shall not apply to the subheadings of this Part.

CHAPTER- 7

Plastics and Articles thereof;

Rubber and Articles thereof

Notes:

1.

Goods put up in sets consisting of two or more separate constituents, some or all of which fall within this Chapter and are intended to be mixed together to obtain a product of Chapter 6 or 7, are to be classified in the heading appropriate to that product, provided that the constituents are:-

(a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

(b) presented together; and

(c) identifiable, whether by their nature or by the relative proportions in which they are presented, as being complementary one to another. 2. Except for goods of heading 39.18 or 39.19, plastics, rubber, or articles thereof, printed with motifs, characters or pictorial representations, which are not merely subsidiary to the primary use of the goods, fall in Chapter 49. PART 39

Plastics and Articles thereof

Notes:

1. Throughout this Schedule the expression 'plastics' means those materials of headings 39.01 to 39.14 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, and, if necessary, with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence. Throughout this Schedule any reference to 'plastics' also includes vulcanised fibre. The expression, however, does not apply to materials considered to be textile materials of Chapter 11. 2.

This Part does not cover: (a) lubricating preparations of heading 27.10 or 34.03; (b) waxes of heading 27.12 or 34.04; (c) separate chemically defined organic compounds (Chapter 29); (d) heparin or its salts (heading 30.01); (e) solutions (other than collodions) consisting of any of the products specified in headings 39.01 to 39.13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading 3208); stamping foils of heading 32.12; (f) organic surface-active agents or preparations of heading 34.02; (g) run gums or ester gums (heading 38.06); (h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (heading 38.11); (i) prepared hydraulic fluids based on polyglycols, silicones or other polymers of Part 39 (heading 38.19); (j) diagnostic or laboratory reagents on a plastic backing (heading 38.22); (k) synthetic rubber or articles thereof, as defined for the purposes of Chapter 40; (l) saddlery or harness goods (heading 42.01); or trunks, suitcases, handbags or other containers of heading 42.02; (m) plaiting materials, basketware and other articles of Chapter 46; (n) wall coverings of heading 48.14; (o) goods of Chapter 11 (textiles and textile articles); (p) goods of Chapter 12 (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof); (q) imitation jewellery of heading 71.17; (r) goods falling within Chapter 16 (machinery and mechanical or electrical appliances); (s) parts of aircraft or vehicles of Chapter 17; (t) articles of Chapter 90 (for example, optical elements, spectacle frames and drawing instruments); (u) articles of Chapter 91 (clocks and watch batteries (watch cases)); (v) articles of Chapter 92 (for example, musical instruments and parts thereof); (w) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs,

prefabricated buildings); (x) articles of Chapter 95 (for example, toys, games and sports requisites); or (y) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette holders or the like, parts of vacuum flasks or the like, pens, mechanical pencils and monopods, bipods, tripods and similar articles). 3.

Headings 39.01 to 39.11 are to be taken to apply only to goods of a kind produced by chemical synthesis, falling in the following categories: (a) liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1013 millibars when a reduced-pressure distillation method is used (headings 39.01 and 39.02); (b) resins of the coumarone-indene type, not highly polymerised (heading 39.11); (c) other synthetic polymers with an average of at least 5 monomer units; (d) silicones (heading 39.10); (e) resols (heading 39.09) and other prepolymers. 4. The expression "copolymers" covers all polymers in which the weight of any single monomer unit constitutes 95% or less of the total polymer content. Unless the context otherwise requires, for the purposes of this Part, copolymers (including copolymer condensates, copolyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of the comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together. Where no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration. 5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers. 6. In headings 39.01 to 39.14, the expression "primary forms" applies only to the following forms: (a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions; (b) blocks of irregular shape, lumps and powders (including moulding powders), granules, flakes and similar bulk forms. 7. Heading 39.15 does not apply to waste, parings and scrap of single thermoplastic materials, transformed into primary forms (headings 39.01 to 39.14). 8. For the purposes of heading 39.17, the expression "tubes, pipes and hoses" means hollow products, semi-manufactured or finished, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (the length not exceeding 1.5 times the width) or regular polygon shape are not to be regarded as tubes, pipes or hoses but as profile shapes. 9.

For the purposes of heading 39.18, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the plastic layer (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated. 10. In headings 39.20 and 39.21, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use). 11. Heading 39.25 applies only to the following products, not falling in any of the earlier headings of Sub-Chapter 2: (a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres; (b) structural elements used, for example, in floors, walls, partitions, ceilings or roofs; (c) gutters and fittings therefor; (d) doors, windows and their frames and thresholds for doors; (e) balconies, balustrades, fencing, gates and similar barriers; (f) shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof; (g) large-scale shelving for fitting and permanent installation, for example, in shops, workshops, warehouses; (h) ornamental architectural motifs, for example,

fluting, cupolas and dovecotes; and (i) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates. Subheading Notes: 1.

Within any one heading of this Part, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions: (a) Where there is a subheading entitled 'Other' in the same series: (1) In any subheading, a polymer is to be specified by the prefix 'poly' (for example, polyethylene and polyamide-6,6) only if the constituent monomer unit or monomer units of the named polymer taken together contribute 95% or more by weight of the total polymer content. (2) Copolymers named in subheadings 3901.30, 3901.40, 3903.20, 3903.30 and 3904.30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content. (3) Chemically modified polymers are to be classified in the subheading entitled 'Other', provided that such chemically modified polymers are not more specifically covered by another subheading. (4) Polymers not complying with (1), (2) or (3) above are to be classified in the subheading, among the remaining sub headings in the series, covering polymers of the monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration shall be compared. (b) Where there is no subheading entitled 'Other' in the same series: (1) Polymers are to be classified in the subheading covering polymers of the monomer unit which predominates by weight over every other comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration shall be compared. (2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer. Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions. 2. For the purposes of subheading 3920.43, the term 'plasticisers' includes secondary plasticisers.

CHAPTER 40

RUBBER AND ARTICLES THEREOF

Notes:

1. Throughout this Schedule, unless the context otherwise requires, the expression "rubber" means the following products, whether or not vulcanized or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such reclaimed substances. 2. This Chapter does not cover:

(a) Goods of Section XI (Textiles and textile articles);

(b) Footwear or parts thereof of Chapter 64;

(c) Headgear or parts thereof of Chapter 65 (including bathing caps);

(d) Mechanical or electrical appliances or parts thereof of Section XVI (including all kinds of electrical goods) of hard rubber;

(e) Articles of Chapter 90, 92, 94 or 96; or

(f) Articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 40.11 to 40.13).

3. In headings 40.01 to 40.03 and 40.05, the expression "primary forms" applies only to the following forms:

(a) Liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);

(b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms. 4.

For the purposes of Note 1 of this Chapter and of heading 40.02, the expression "synthetic rubber" applies to: (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, on being stretched to three times their original length at a temperature between 18°C and 29°C, do not break and which, on being stretched to twice their original length, return within a period of five minutes to a length not exceeding one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanisation activators or accelerators, may be added; the presence of substances provided for in Note 5(b)(ii) is also permissible. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, shall not be permitted; (b) Thioplasts (TM); and (c) Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers, provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery set out in paragraph (a) above. 5.

(a) Headings 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with any substance other than the following: (1) Vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex); (2) Pigments or other colouring matter, other than those added solely for identification purposes; (3) Plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permissible under (b); (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 40.01 or 40.02, provided that such rubber or mixture of rubbers retains its essential character as raw material: (1) Emulsifiers or anti-tack agents; (2) Small amounts of breakdown products of emulsifiers; (3) Very small amounts of the following: heat-sensitive agents (generally for obtaining heat-sensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resistant agents, peptisers, preservatives, stabilisers, viscosity-control agents or similar special-purpose additives. 6.

For the purposes of heading 40.04, the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber or of articles of rubber, and rubber goods definitely not usable as such because of cutting, wear or other reasons. 7. Thread of vulcanised rubber, of any cross-sectional dimension exceeding 5 mm, is to be classified as strip, rod or profile shape of heading 40.08. 8. Heading 40.10 includes conveyor or transmission belts or belting of textile cord or fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber. 9. In headings 40.01, 40.02, 40.03, 40.05 and 40.08, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip, whether or not cut to rectangular (including square) shape but not further worked, whether or not printed or otherwise surface-worked, but not cut to shape or otherwise worked. Subheading Notes: 1. For the purposes of subheading 4401.31.00, the expression "wood pellets" means by-products such as cutter shavings, sawdust or small chips from the mechanical wood processing industry, furniture making or other wood transformation activities, which are agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight. Such pellets are cylindrical, with a diameter not exceeding 25 mm and a length not exceeding 100 mm. 2. For the purposes of subheading 4401.32.00, the expression "wood briquettes" means by-products such as cutter shavings, sawdust or small chips or fragments from the mechanical wood processing industry, furniture making or other wood transformation activities, which are agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight. Such briquettes are in the form of cubiform, polyhedral or cylindrical units with a minimum cross-sectional dimension greater than 25 mm. 3. For the purposes of subheading 4407.13.00, "S-P-F" refers to mixed stands of spruce, pine and fir, where the proportion of each species varies and is unknown. 4. For the purposes of subheading 4407.14.00, "Hem-fir" refers to mixed stands of western hemlock and fir, where the proportion of each species varies and is unknown.

For the purposes of this Chapter, unless the context otherwise requires, a reference to "paper" includes references to paperboard (whatever the thickness or the weight per m2). 2.

This Chapter does not cover: (a) Articles of Chapter 30; (b) Stamping foils of heading 32.12; (c) Perfumed papers or papers impregnated or coated with cosmetics (Chapter 33); (d) Paper or cellulose wadding impregnated, coated or covered with soap or detergent (heading 34.01) or with polishes, creams or similar preparations (heading 34.05); (e) Sensitised paper and paperboard of headings 37.01 to 37.04; (f) Paper impregnated with diagnostic or laboratory reagents (heading 38.22); (g) Paper-reinforced stratified plastic sheeting, or one layer of paper or paperboard coated or covered with a layer of plastic, the latter constituting

more than half the thickness of the article, or articles of such materials, other than wall coverings of heading 48.14 (Chapter 39); (h) Articles of heading 42.02 (for example, travel goods); (i) Articles of Chapter 46 (manufactures of plaiting material); (j) Paper yarn or textile fabric of paper yarn (Section 11); (k) Articles of Chapter 64 or Chapter 65; (l) Abrasive paper or paperboard (heading 68.05); (m) Paper or paperboard backed mica (heading 68.14) or paper or paperboard backed metal foil (generally Chapter 14 or 15); (n) Articles of heading 92.09; (o) Articles of Chapter 95 (for example, toys, games, sports requisites); or (p) Articles of Chapter 96 (for example, buttons, sanitary towels (pads) and tampons, napkins (diapers) and napkin liners. 3. Subject to the provisions of Note 7, headings 48.01 to 48.05 include paper and paperboard which have been subjected to calendering, super-calendering, glazing or similar finishing, false watermarking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibres, coloured or marbled throughout the mass by any method. Except where heading 48.03 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed. 4. In this Chapter, "newsprint" means uncoated paper of a kind used for printing newspapers, of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m² and not more than 65 g/m², and applies only to paper: (a) in rolls or strips of a width exceeding 28 cm; or (b) in rectangular (including square) sheets with one side exceeding 28 cm and the other side exceeding 15 cm in the unfolded state. 5.

For the purposes of heading 48.02, the expressions "paper and paperboard of a kind used for writing, printing or other graphic purposes" and "non-perforated punch-cards and punch tape paper" mean paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process, which satisfy any of the following criteria: (A) For paper or paperboard weighing not more than 150 g/m²: (a) Contains 10% or more of fibres obtained by a mechanical or chemi-mechanical process, and 1. Weighs not more than 80 g/m², or 2. Is coloured throughout the mass; or (b) Contains more than 8% ash, and 1. Weighs not more than 80 g/m², or 2. Is coloured throughout the mass; or (c) Contains more than 3% ash and has a brightness of 60% or more; or (d) Contains more than 3% but not more than 8% ash, has a brightness less than 60% and a burst index equal to or less than 2.5 kPa·m²/g; or (e) Contains 3% or less ash, has a brightness of 60% or more and a burst index of 2.5 kPa·m²/g or less. (B) For paper or paperboard weighing more than 150 g/m²: (a) Is coloured throughout the mass; or (b) Has a brightness of 60% or more, and 1. Has a caliper of 225 micrometres (microns) or less, or 2. Has a caliper more than 225 micrometres (microns) but not more than 508 micrometres (microns) and an ash content greater than 3%; or (c) Has a brightness of less than 60%, a caliper of 224 micrometres (microns) or less and an ash content of more than 8%. However, heading 48.02 does not cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard. 6. In this Chapter, "kraft paper and paperboard" means paper and paperboard of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes. 7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of headings 48.01 to 48.11 are to be classified under that one of such headings which occurs last in numerical order in this Schedule. 8. Headings 48.03 to 48.09 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres: (a) In rolls or strips of a width exceeding 36 cm; or (b) In rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state. 9.

For the purposes of heading 48.14, the expression "wallpaper and similar wall coverings" applies only to: (a) Paper in rolls of a width of 45 cm to 160 cm, suitable for wall or ceiling decoration: 1. Grained, embossed,

surface-coloured, design-printed or otherwise surface-decorated (e.g., with textile flock), whether or not coated or covered with transparent protective plastic; 2. With an uneven surface resulting from the incorporation of wood chips, straw, etc.; 3. Coated or covered on the face side with plastic, the plastic being grained, embossed, coloured, design-printed or otherwise decorated; or 4. Covered on the face side with plaiting material, whether or not bound together in parallel strands or woven; (b) Borders and friezes, of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration; (c) Wall coverings of paper, made up in rolls or sheets, printed to form views, designs or motifs when applied to a wall. Products of paper or paperboard, suitable for use both as floor coverings and as wall coverings, shall be classified in heading 48.23. 10. Heading 48.20 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated. 11. Heading 48.23 applies, inter alia, to perforated paper or paperboard cards for jacquard or similar machines, and paper lace. 12. Except for the articles of heading 48.14 or 48.21, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely subsidiary to the primary use of the goods, fall in Chapter 49. 2.

For the purposes of subheadings 4804.21 and 4804.29, "sack kraft paper" means machine-finished paper, of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes, in rolls, weighing not less than 60 g/m² but not more than 115 g/m², and which conforms to one of the following sets of specifications: (a) Has a Mullen burst index of not less than 3.7 kPa·m²/g and a stretch factor of more than 4.5% in the cross direction and more than 2% in the machine direction. (b) Has the minima for tear and tensile as indicated in the table below or the linearly interpolated equivalent for any other weight: Weight g/m² Minimum Tear mN Minimum Tensile kN/m Machine Direction Machine Direction + Cross Direction Cross Direction Machine Direction + Cross Direction

5. For the purposes of subheadings 4805.11 and 4805.12, "semi-chemical fluting paper" means paper in rolls, obtained by a combination of mechanical and chemical pulping processes, of which not less than 65% by weight of the total fibre content consists of unbleached hardwood fibres, and having a Corrugated Medium Test with 30 minutes of conditioning (CMT 30) crush resistance exceeding 1.8 newtons per gram per square metre at 23°C and 50% relative humidity. For the purposes of subheading 4805.11, "semi-chemical fluting paper" means paper in rolls, obtained by a combination of mechanical and chemical pulping processes, of which not less than 65% by weight of the total fibre content consists of unbleached hardwood fibres, and having a Corrugated Medium Test with 30 minutes of conditioning (CMT 30) crush resistance exceeding 1.8 newtons per gram per square metre at 23°C and 50% relative humidity. Subheading 4805.12 covers paper, in rolls, made mainly from straw pulp obtained by a combination of mechanical and chemical processes, weighing 130 g/m² or more, and having a Corrugated Medium Test with 30 minutes of conditioning (CMT 30) crush resistance exceeding 1.4 newtons per gram per square metre at 23°C and 50% relative humidity. 5. Subheadings 4805.24 and 4805.25 cover paper and paperboard made wholly or mainly from pulp of recovered (waste and scrap) paper or paperboard. Testliner may also have a surface layer of dyed paper or of paper made from non-recovered bleached or unbleached pulp. These products have a Mullen burst index of not less than 2 kPa·m²/g. 6.

For the purposes of subheading 4805.30, "sulphite wrapping paper" means machine-glazed paper, of which more than 40% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphite process, having an ash content not exceeding 8% and a Mullen burst index of not less than 1.47 kPa·m²/g. 7.

For the purposes of subheading 4810.22, "light-weight coated paper" means paper, coated on both sides, of a total weight not exceeding 72 g/m², with a coating weight not exceeding 15 g/m² per side, on a base of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical process.

When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration. (B) For the purposes of the above rule: (a) Gimped horsehair yarn (heading 51.10) and metallized yarn (heading 56.05) are to be treated as a single textile material of which the weight is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material; (b) The choice of appropriate heading shall be effected by determining first the Chapter and then, within that Chapter, the applicable heading, disregarding any materials not classified in that Chapter; (c) When both Chapters 54 and 55 are involved with any other Chapter, Chapters 54 and 55 are to be treated as a single Chapter; (d) Where a Chapter or a heading refers to goods of different textile materials, such materials are to be treated as a single textile material. (C) The provisions of paragraphs (A) and (B) above also apply to the yarns referred to in Notes 3, 4, 5 or 6 below.

3. (A) For the purposes of this Section, and subject to the exceptions in paragraph (B) below, yarns (single, multiple (folded) or cabled) of the following descriptions are to be treated as "twine, cordage, ropes and cables":

(a) Of silk or waste silk, of a linear density exceeding 20,000 decitex;

(b) Of man-made fibers (including yarn of two or more monofilaments of Chapter 54), of a linear density exceeding 10,000 decitex;

(c) Of true hemp or flax:

(1) Polished or glazed, of a linear density of 1,429 decitex or more; or

(2) Not polished or glazed, of a linear density exceeding 20,000 decitex;

(d) Of coir, of three or more plies;

(e) Of other vegetable fibers, of a linear density exceeding 20,000 decitex; or

(f) Reinforced with metal thread.

(B) Exceptions:

(a) Yarn of wool or other animal hair and paper yarn, other than yarn reinforced with metal thread;

(b) Man-made filament tow of Chapter 55 and multifilament yarn without twist or with a twist of less than 5 turns per meter of Chapter 54;

(c) Silkworm gut of heading 50.06, and monofilaments of Chapter 54;

(d) Metallized yarn of heading 56.05; yarn reinforced with metal thread, subject to paragraph (A)(f) above; and

(e) Chenille yarn, gimped yarn and loop wale-yarn, of heading 56.06. 4. (A) For the purposes of Chapters 50, 51, 52, 54 and 55, the expression "put up for retail sale" means, subject to the exceptions in paragraph (B) below, yarn (single, multiple

(?) Assembles, gummed, or otherwise gathered (excluding those made by joining edge-to-edge pieces of the same type of fabric of two or more different lengths, or by layering pieces of two or more different types of fabric, whether quilted or not);

(?) Knitted or crocheted into shape, presented as separate articles or as a variety of articles in length. 8. For the purposes of Sections 50 to 60:

(?) In the case of made-up articles defined in Note 7 above, Sections 50 to 55 and 60 shall apply, and, unless the context otherwise requires, Sections 56 to 59 shall not apply.

(?) In the case of articles of Sections 56 to 59, Sections 50 to 55 and 60 shall not apply. 9. Woven fabrics of Sections 50 to 55 shall also include layered fabrics in which parallel textile yarns are superimposed on each other at an acute or right angle. These layers are bonded by an adhesive at the intersection points of the yarns or by thermal bonding. 10. Elastic products consisting of textile materials combined with rubber threads shall be classified in this Chapter. 11. For the purposes of this Chapter, the term "impregnated" also includes "coated" or "dipped". 12.

For the purposes of this Chapter, the term "polyamides" also includes "aramids". 13. Throughout this Chapter and this Schedule, where applicable, "elastomeric yarn" means a filamentary yarn, including monofilament, of synthetic textile materials (other than textured yarn), which does not break on being extended to three times its original length and which retracts, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length. 14. Unless the context otherwise requires, textile garments of different headings shall be classified in their own respective headings, even if put up in sets for retail sale. For the purposes of this Note, "textile garments" means garments of headings 61.01 to 61.14 and headings 62.01 to 62.11. 15. Subject to Note 1 of Chapter 11, textile materials, garments, and textile articles having incorporated as an integral part, chemical, mechanical, or electrical components for additional functionality, or having such components embedded within the fiber or fabric, shall be classified in the appropriate headings of Chapter 11, provided they retain the essential character of articles of this Chapter. Subheading Notes: 1. In this Chapter and throughout this Schedule, where applicable, the following terms have the meanings hereby assigned to them: (?) Unbleached yarn Yarn which: (1) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not uniformly) or printed; (2) is produced from garnetted stock (recovered from waste) and is of indeterminate colour ("grey yarn").

Such yarn may have been treated with a colourless dressing or fugitive dye (which fades on ordinary washing with soap), and, in the case of man-made fibres, may have been treated overall with a delustering agent

(e.g., titanium dioxide).

(?) Bleached yarn

Yarn which:

- (1) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise provides, has been dyed white (whether or not uniformly) or treated with a white dressing;
- (2) consists of a mixture of unbleached and bleached fibres; or
- (3) is multiple (folded) or cabled and consists of unbleached and bleached yarns.

(?) Coloured (dyed or printed) yarn

Yarn which:

- (1) is dyed (whether or not uniformly) other than white, or is dyed with a fugitive dye, or is printed, or is made from dyed or printed fibres;
- (2) consists of a mixture of dyed fibres of different colours or a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in a manner giving the appearance of intermittent spots of one or more colours;
- (3) is obtained from printed slivers or rovings; or
- (4) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn. The above definitions also apply, with necessary modifications, to monofilament and strip or the like of Section 54.

(?) Unbleached woven fabrics

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed.

Such fabric may have been treated with a colourless dressing or fugitive dye. (?) Bleached woven fabrics

Woven fabric which: (1) has been bleached or, unless the context otherwise provides, dyed white in the piece or treated with a white dressing; (2) consists of bleached yarns; or (3) consists of unbleached and bleached

yarns. (?) Dyed woven fabrics Woven fabric which: (1) has been uniformly dyed in the piece in a single colour other than white (unless the context otherwise provides) or has been treated with a finish other than white (unless the context otherwise provides); or (2) consists of uniformly coloured yarn of the same colour. (?)

Woven fabrics of yarns of different colours Woven fabric (other than printed woven fabric) which: (1) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres); (2) consists of unbleached or bleached yarn and coloured yarn; or (3) consists of marl or mixture yarns. (In all cases, yarns used in the edges and ends of the fabric are not taken into account.) (?)

Printed woven fabric Woven fabric which has been printed in the piece, whether or not made from yarns of different colours. (The following are also considered printed woven fabric: woven fabric bearing designs, for example, obtained by means of a brush or spray gun, by transfer paper, by applying other textile material to the base fabric, or by the batik process.) Mercerization does not affect the classification of yarns or fabrics

within the above categories. The definitions in (?) to (?) above apply, with necessary modifications, also to knitted or crocheted fabrics. (?) Plain weave A fabric construction in which each weft yarn passes alternately over and under successive warp yarns, and each warp yarn passes alternately over and under successive weft yarns.

2. (?) Products of Sections 56 to 63 consisting of two or more textile materials shall be considered to be wholly made of the textile material which would be selected under Note 2 of this Chapter for the classification of a product of Sections 50 to 55 or heading 58.09 made of the same textile materials. (?) For the application of this rule: (?) only the constituent which determines the classification under Interpretative Rule 3 shall be taken into account, as the case may be; (?) in the case of a product with a ground fabric and a pile or looped

surface, the ground fabric shall not be taken into account; (?) in the case of embroidery of heading 58.10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery and goods thereof where the ground fabric is not visible shall be classified by reference only to the embroidery yarns.

Throughout this Schedule, "man-made fibres" means the main fibres (staple fibres and filaments) of organic polymers produced by one of the following manufacturing processes: (a) Polymerisation of organic monomers for the production of polymers, such as polyamides, polyesters, polyolefins of polyurethanes, or by chemical transformation of polymers produced by this process (e.g., poly(vinyl alcohol) prepared by hydrolysis of poly(vinyl acetate)); or (b) Dissolution or chemical treatment of natural organic polymers (e.g., cellulose) for the production of polymers such as cuprammonium rayon (cupro) or viscose rayon, or by chemical transformation of natural organic polymers (e.g., cellulose, casein and other proteins, or alginic acid) for the production of polymers such as cellulose acetate or alginates. The terms "synthetic" and "artificial" used in relation to fibres mean: synthetic: fibres as defined in (a); artificial: fibres as defined in (b). Strip and the like of heading 54.04 or 54.05 are not considered to be man-made fibres. The terms "man-made", "synthetic" and "artificial" shall have the same meaning when used in relation to textile materials. 2. Headings 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Part 54. MAN-MADE STAPLE FIBRES

Note:

1. Headings 55.01 and 55.02 apply only to man-made filament tow, consisting of parallel filaments of uniform length equal to the length of the tow (a bundle of synthetic fibres prepared for spinning) as described below:

(a) Length of the tow exceeding 2 m;

(b) Twist less than 5 turns per metre;

(c) Each filament measuring less than 67 decitex;

(d) For synthetic filament tow only: such tow must be drawn, i.e., when stretched, it does not elongate by more than 100 percent of its length;

(e) Total tow measuring more than 20,000 decitex. Tow not exceeding 2 m in length shall be classified under heading 55.03 or 55.04.

Impregnated, coated, covered or laminated textile fabrics; textile articles of a kind suitable for industrial use

Notes: 1. Except where the context otherwise requires, for the purposes of this Chapter, the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and headings 58.03 and 58.06, the braids and ornamental trimmings in the piece of heading 58.08, and the knitted or crocheted fabrics of

headings 60.02 to 60.06. 2. Heading 59.03 applies to: (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than: (1) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purposes of this provision, no account shall be taken of any resulting change of colour; (2) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm at a temperature between 15°C and 30°C (usually Chapter 39); (3) Products in which the textile fabric is completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39); (4) Fabrics partially coated or partially covered with plastics and bearing designs resulting from such treatment (usually Chapters 50 to 55, 58 or 60); (5) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or (6) Textile products of heading 58.11. (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 56.04. 3. For the purposes of heading 59.03, "textile fabrics laminated with plastics" means products made by bonding one or more layers of textile fabric to one or more sheets or films of plastics, whether or not the sheets or films are visible in the cross-section, the bonding being effected by any process which combines the layers together. 4.

This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading 48.14) or on a textile backing (generally heading 59.07). 5. For the purposes of heading 59.06, the expression "rubberised textile fabrics" means: (a) Textile fabrics impregnated, coated, covered or laminated with rubber, (1) Weighing not more than 1,500 g/m²; or (2) Weighing more than 1,500 g/m² and containing more than 50 per cent by weight of textile material; (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 56.04; and (c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre. This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or to textile products of heading 58.11. 6. Heading 59.07 does not apply to: (a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purposes of this provision, no account shall be taken of any resulting change of colour; (b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like); (c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from such treatment; however, imitation pile fabrics fall in this heading; (d) Fabrics finished with dressings having a basis of amylaceous or similar substances; (e) Wood veneered on a backing of textile fabric (heading 44.08); (f) Natural or artificial abrasive powder or grain on a backing of textile fabric (heading 68.05); (g) Agglomerated or reconstituted mica on a backing of textile fabric (heading 68.14); or (h) Metal foil on a backing of textile fabric (generally Section 14 or 15). 7. Heading 59.10 does not apply to: (a) Transmission or conveyor belts or belting, of textile material, of a thickness of less than 3 mm; or (b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 40.10). 8.

This Chapter applies only to made up articles, knitted or crocheted. 2. This Chapter does not cover: (a) Goods of heading 62.12; (b) Worn clothing or other worn articles of heading 63.09; or (c) Orthopaedic appliances, surgical belts, trusses or the like (heading 90.21). 3.

For the purposes of headings 61.03 and 61.04: (a) The term "suit" means a set of garments composed of two or three pieces, made up, in respect of their outer surface, of identical fabric, and comprising: - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat, the front of which is made of the same fabric as the outer surface of the other components of the set and the back of which is made of the same fabric as the lining of the suit coat or jacket; and - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt (a garment resembling loose trousers matching the skirt), having neither braces nor bib. All the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) of a different fabric. If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the lower part shall consist of one pair of trousers or, in the case of women's or girls' suits, a skirt or divided skirt. The other garments shall be treated separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions: - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging down to the back and striped trousers; - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close, has cut-away portions at the hips and has narrow, hanging tails at the back; - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (possibly more open at the front to

expose most of the shirt front), but has shiny lapels of silk or imitation silk. (b) The term "ensemble" means a set of garments (other than suits and articles of heading 61.07, 61.08 or 61.09), composed of several pieces made up of identical fabric, put up for retail sale, and consisting of: - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of sleeveless waistcoats (which may also serve as a second upper garment), and - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt. All the components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 61.12. 4. Headings 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted over an area measuring at least 10 cm x 10 cm. Heading 61.05 does not cover sleeveless garments. "Shirts" and "shirt-blouses" are garments designed to cover the upper part of the body, having long or short sleeves, and a full or partial opening starting at the neckline. "Blouses" are also loose-fitting garments designed to cover the upper part of the body, but they may be sleeveless and may or may not have an opening at the neckline. "Shirts", "shirt-blouses" and "blouses" may also have a collar. 5. Heading 61.09 does not cover garments with a bra, ribbed waistband or other means of tightening at the bottom of the garment. 6.

For the purposes of heading 61.11: (a) "Babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; (b) Articles which are, prima facie, classifiable both in heading 61.11 and in other headings of this Chapter shall be classified in heading 61.11. 7. For the purposes of heading 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist of either: (a) A "ski overall", that is, a one-piece garment designed to cover the upper and lower parts of the body; in addition to sleeves and a collar, the ski overall may have pockets and footstraps; or (b) A "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale, comprising: - one garment such as an anorak, windcheater, wind jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat, and - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall. The "ski ensemble" may also consist of an overall as described in paragraph (a) above and a padded sleeveless jacket worn over the overall. All the components of a "ski ensemble" must be made up of fabrics of identical construction, style and composition and may be of the same colour or different colours; they must also be of corresponding or compatible size. 8. Garments which are, prima facie, classifiable both in heading 61.13 and in other headings of this Chapter, excluding heading 61.11, shall be classified in heading 61.13. 9. Garments of this Chapter designed for left front over right front closure at the front shall be regarded as men's or boys' garments, and garments designed for right front over left front closure at the front shall be regarded as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates its destination as men's or boys', or women's or girls'. This Chapter does not cover: (a) Worn clothing or other worn articles of heading 63.09; or (b) Orthopaedic appliances, surgical belts, trusses or the like (heading 90.21). 3.

For the purposes of headings 62.03 and 62.04: (a) The term "suit" means a set of garments composed of two or three pieces, made up, in respect of their outer surface, of identical fabric, and comprising: - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat, the front of which is made of the same fabric as the outer surface of the other components of the set and the back of which is made of the same fabric as the lining of the suit coat or jacket; and - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt (a garment resembling loose trousers matching the skirt), having neither braces nor bib. All the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) of a different fabric. If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the lower part shall consist of one pair of trousers or, in the case of women's or girls' suits, a skirt or divided skirt. The other garments shall be treated separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions: - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging down to the back and striped trousers; - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close, has cut-away portions at the hips and has narrow, hanging tails at the back; - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (possibly more open at the front to expose most of the shirt front), but has shiny lapels of silk or imitation silk. (b) The term "ensemble" means a set of garments (other than suits and articles of heading 62.07 or 62.08), composed of several pieces made up of identical fabric, put up for retail sale, and consisting of: - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also serve as a second upper garment, and - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt. All the components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 62.11. 4. Headings 62.05 and 62.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment. Heading 62.05 does not cover sleeveless garments. "Shirts" and "shirt-blouses" are garments designed to cover the upper part of the body, having long or short sleeves, and a full or partial opening starting at the neckline. "Blouses" are also loose-fitting garments designed to cover the upper part of the body, but they may be sleeveless and may or may not have an opening at the neckline. "Shirts", "shirt-blouses" and "blouses" may also have a collar. 5. Articles which are, prima facie, classifiable both in heading 62.10 and in other headings of this Chapter, excluding heading 62.09, shall be classified in heading 62.10. 7.

For the purposes of heading 62.11, "ski suits" means garments or sets of garments which, by their general

appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist of either: (a) A "ski overall", that is, a one-piece garment designed to cover the upper and lower parts of the body; in addition to sleeves and a collar, the ski overall may have pockets and footstraps; or (b) A "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale, comprising: - one garment such as an anorak, windcheater, wind jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat, and - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall. The "ski ensemble" may also consist of an overall as described in paragraph (a) above and a padded sleeveless jacket worn over the overall. All the components of a "ski ensemble" must be made up of fabrics of identical construction, style, and composition and may be of the same colour or different colours; they must also be of corresponding or compatible size.

Section 71

Natural or cultured pearls, precious or semi-precious stones, precious metals, metals clad with precious metal, and articles thereof; imitation jewellery; coins

Notes:

1. Subject to Note 1(a) of Chapter 6 and except as provided below, all articles consisting wholly or partly:

(a) of natural or cultured pearls or of precious or semi-precious stones (natural, synthetic or reconstructed),
or

(b) of precious metal or of metal clad with precious metal,

are to be classified in this section. 2. (a) Headings 71.13, 71.14 and 71.15 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (b) of the foregoing note does not apply to such articles. The part of the note underlined above indicates an optional phrase.

(b) Heading 71.16 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents). 3. This section does not cover:

(a) Amalgams of precious metal or colloidal precious metals (heading 28.43);

(b) Sterile surgical suture materials, dental fillings or other goods of Section 30;

(c) Goods of Section 32 (for example, lustres);

However, articles and parts thereof, wholly of precious or semi-precious stones (natural, synthetic or reconstructed) remain classified in this section, except unmounted sapphires and diamonds for styli (heading 59.22);

(k) Articles of Section 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);

(l) Arms and parts thereof (Section 93);

(m) Articles covered by Note 2 of Section 95;

(n) Articles classified in Section 96 by virtue of Note 4 of that Section; or

(o) Original sculptures or statuary (heading 97.03), collectors' pieces (heading 97.05) or antiques of an age exceeding one hundred years (heading 97.06), other than natural or cultured pearls or precious or

semi-precious stones.

4. (a) The expression "precious metal" means silver, gold and platinum.

(b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.

(c) The expression "precious or semi-precious stones" does not include any of the substances specified in Note 2(b) of Section 96. 5. For the purposes of this section, any alloy (including a sintered mixture and an intermetallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:

(a) An alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;

(b) An alloy containing 2% or more, by weight, of gold but less than 2%, by weight, of platinum is to be treated as an alloy of gold;

(c) Other alloys containing 2% or more, by weight, of silver are to be treated as alloys of silver. 6. Except where the context otherwise requires, any reference in this Schedule to precious metal or to any particular precious metal includes, where applicable, an alloy of precious metal or of that particular precious metal treated as such in accordance with the rules in Note 5 above, but does not include metal clad with precious metal or base metal or non-metal plated with precious metal. 7. Throughout this Schedule, the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal. 8. Subject to Note 1(a) of Chapter 6, goods answering to a description in heading 71.12 are to be classified in that heading and in no other heading of this Schedule. 9. For the purposes of heading 71.13, the expression "articles of jewellery" means:

These articles may be combined or set, for example, with natural or cultured pearls, precious or semi-precious stones, synthetic or reconstructed precious or semi-precious stones, tortoise shell, mother of pearl, ivory, natural or reconstructed amber, jet or coral. 10.

For the purposes of heading 71.14, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' requisites and articles of household, office or religious use. 11. For the purposes of heading 71.17, the expression "imitation jewellery" means articles of jewellery within the meaning of paragraph (a) of Note 9 above (but not including buttons or other articles of heading 96.06, or dress-combs, hair-slides or the like of heading 96.15, or hair-pins). It does not include articles incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as minor constituents) precious metal or metal clad with precious metal. Subheading Notes: 1. For the purposes of subheadings 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, the expressions "powder" and "in powder form" mean products of which 90% or more by weight passes through a sieve having a mesh aperture of 0.5 mm. 2. Notwithstanding the provisions of Note 4(b) of this Section, for the purposes of subheadings 7110.11 and 7110.19, the term "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium. 3. For the classification of alloys in the subheadings of heading 71.10, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals. Chapter 15

Base metals and articles of base metal

Notes:

1. This chapter does not cover:

- (a) Prepared paints, inks or other products with a basis of metallic flakes or powder (headings 32.07 to 32.10, 32.12, 32.13 or 32.15);
- (b) Ferro-cerium or other pyrophoric alloys (heading 36.06);
- (c) Headgear or parts thereof of heading 65.06 or 65.07;
- (d) Umbrella frames or other articles of heading 66.03;
- (e) Goods of Section 71 (for example, precious metal alloys, base metal clad with precious metal, imitation jewellery);
- (f) Articles of Section 16 (machinery, mechanical appliances and electrical goods);
- (g) Assembled railway or tramway track (heading 86.08) or other articles of Section 17 (vehicles, ships and boats, aircraft);
- (h) Instruments or apparatus of Section 18, including clock springs;
- (i) Lead shot or pellets prepared for ammunition (heading 93.06) or other articles of Section 19 (arms and ammunition);
- (j) Articles of Section 94 (for example, furniture, mattress supports, luminaires and lighting fittings, illuminated signs, prefabricated buildings);
- (k) Articles of Section 95 (for example, toys, games, sports requisites);
- (l) Hand sieves, buttons, pens, pencil-holders, pen-nibs, monopods, bipods, tripods and similar articles or other articles of Section 96 (miscellaneous manufactured articles); or
- (m) Articles of Section 97 (for example, works of art).

2. Throughout this Schedule, the expression "parts of general use" means:

- (a) Articles of heading 73.07, 73.12, 73.15, 73.17 or 73.18 and similar articles of other base metal, other than articles specially designed for use primarily in implantation in medical, surgical, dental or veterinary sciences (heading 90.21);
- (b) Springs and leaves for springs, of base metal, other than clock springs (heading 91.14); and
- (c) Articles of heading 83.01, 83.02, 83.08, 83.10 and frames and mirrors, of base metal, of heading 83.06.

Reference to parts in Sections 73 to 76 and Sections 78 to 82 (other than heading 73.15) does not include reference to parts of general use as defined above.

Subject to the preceding paragraph and to Note 1 of Section 83, articles of Section 82 or Section 83 are excluded from Sections 72 to 76 and Sections 78 to 81.

3. Throughout this Schedule, the expression "base metals" means: iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

4. Throughout this Schedule, the term "cermets" means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term "cermets" also includes sintered metal carbides (metal carbides sintered with a metal).

5. Classification of alloys (other than ferro-alloys and master alloys as defined in Sections 72 and 74):

- (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each other metal;
- (b) An alloy composed of base metals of this Section and elements not falling within this Section is to be treated as an alloy of base metals if the total weight of such metals equals or exceeds the total weight of the other elements present;
- (c) In this Section, the term "alloy" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in this Schedule to a base metal includes, by reason of Note 3 above, alloys which are to be classified as alloys of that metal.

7. Classification of composite articles: Except where the headings otherwise

require, articles of base metal (including articles of mixed materials treated as articles of base metal under the General Rules for Interpretation) containing two or more base metals are to be treated as articles of the base metal which predominates by weight over each other metal. For this purpose: (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal; (b) By reason of Note 5, an alloy is regarded as being constituted entirely of the metal with which it is to be classified as an alloy; and (c) Cermets of heading 81.13 are regarded as a single base metal. 8.

In this Section, the following expressions have the meanings hereby assigned to them: (a) Waste and scrap (i) All metal waste and scrap; (ii) Metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons. (b) Powders Products of which 90% or more by weight passes through a sieve having a mesh aperture of 1 mm. 9. For the purposes of Sections 74 to 76 and Sections 78 to 81, the following expressions have the meanings hereby assigned to them: (a) Bars and rods Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including modified rectangular) cross-section may have corners rounded along their whole length. The thickness of such products which are of rectangular (including modified rectangular) cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings. However, wire-bars and billets of Section 74 with their ends tapered or otherwise worked to facilitate their entry into machines for converting them into, for example, drawing-stock (wire-rod) or tubes, are to be taken as unwrought copper of heading 74.03. This provision applies *mutatis mutandis* to the products of Section 81. (b) Profiles Rolled, extruded, drawn, forged or formed products, coiled or not, having a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings. (c) Wire Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including modified rectangular) cross-section may have corners rounded along their whole length.

The thickness of such products which are of rectangular (including modified rectangular) cross-section exceeds one-tenth of the width. (d) Plates, sheets, strip and foil Flat-surfaced products (other than unwrought products of heading 80.01), coiled or not, of solid rectangular (other than square) cross-section, with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel), of a uniform thickness, which: - if rectangular (including square) shape, have a thickness not exceeding one-tenth of the width, - if other than rectangular or square shape, of any size, provided they do not assume the character of articles or products of other headings. Headings for plates, sheets, strip and foil apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings. (e) Tubes and pipes Hollow products, coiled or not, which have a

uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings. Section 72 Iron and steel Notes: 1. In this Section and, in the case of Notes (d), (e) and (f) throughout this Schedule, the following expressions have the meanings hereby assigned to them: (a) Pig iron Iron-carbon alloys not (Tha) Other bars and rods Products having a uniform solid cross-section along their entire length, which do not conform to any of the definitions at (Ja), (Jha), or (Ta) above, or to the definition of wire, in the shape of circles (circles), segments of circles, ovals, rectangles (including squares), triangles, or other convex polygons (including "wide circles" and "modified rectangles" where the opposite sides are convex arcs and the other two sides are straight, of equal length, and parallel).

Such products may be as follows:

- Those having indentations, ribs, grooves, or other deformations produced during the rolling process (for reinforcing bars and rods);
- Twisted after the rolling process.

(Da) Angles, shapes, and sections

Products having a uniform solid cross-section along their entire length, which do not conform to any of the definitions at (Ja), (Jha), (Ta), or (Tha) above, or to the definition of wire. Products of heading 73.01 or 73.02 are not included in Chapter 72.

(Dha) Wire

Cold-formed products in coils, having any uniform solid cross-section along their entire length, which do not conform to the definition of flat-rolled products.

(Na) Hollow drill bars and rods

Hollow bars and rods of any cross-section, with a maximum external dimension exceeding 15 mm but not exceeding 52 mm, and having a maximum internal dimension not exceeding half of the maximum external dimension, of a kind suitable for drills. Hollow bars and rods of iron or steel not conforming to this definition are classified in heading 73.04. 2. Classification of clad products of other ferrous metals

Clad products of other ferrous metals shall be classified as products of that ferrous metal which predominates by weight. 3. Products of iron or steel obtained by electrolytic deposition, by pressure casting, or by sintering Products of iron or steel obtained by electrolytic deposition, by pressure casting, or by sintering shall be classified, according to their form, composition, and appearance, in the headings of this Chapter appropriate to similar hot-rolled products. Subheading Notes:

1. In this Chapter, the following expressions have the meanings hereby assigned to them:

(a) Alloy pig iron

Pig iron containing, by weight, one or more of the following elements in the specified proportions:

- More than 0.2% of chromium
- More than 0.3% of copper
- More than 0.3% of nickel
- More than 0.1% of any of the following: aluminium, molybdenum, titanium, tungsten (wolfram), vanadium

(b) Non-alloy free-cutting steel

Non-alloy steel containing, by weight, one or more of the following elements in the specified proportions:

- 0.08% or more of sulphur
- 0.1% or more of lead
- More than 0.05% of selenium
- More than 0.01% of tellurium
- More than 0.05% of bismuth

(c) Silicon-electrical steel

Alloy steels containing, by weight, at least 0.6% but not more than 6% of silicon and not more than 0.08% of carbon.

They may contain, by weight, not more than 1% of aluminium, but no other elements in proportions that would give the steel the characteristics of another alloy steel.

(d) High-speed steel

Alloy steels containing, by weight, 0.6% or more of carbon and 3% to 6% of chromium, and containing, by weight, 7% or more of at least two of the three elements molybdenum, tungsten, and vanadium, with or without other elements.

(e) Silico-manganese steel

Alloy steels containing, by weight:

- ? not more than 0.7% of carbon,
 - ? 0.5% or more but not more than 1.9% of manganese, and
 - ? 0.6% or more but not more than 2.3% of silicon, but no other elements in proportions that would give the steel the characteristics of another alloy steel.
2. For the classification of ferro-alloys in the subheadings of heading 72.02, the following rule shall be observed:

A ferro-alloy is considered as binary and classified in the appropriate subheading (if it exists) if only one element of the alloy exceeds the minimum percentage referred to in Note 1(c) of this Chapter; by analogy, it is considered as ternary or quaternary respectively if two or three elements exceed the minimum percentage. For the application of this rule, each "other element" unspecified in Note 1(c) of this Chapter must be present in a proportion by weight exceeding 10%.

Chapter 73

Articles of iron or steel

Notes:

1. In this Chapter, the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not conform to the chemical composition of steel as defined in Note 1(d) of Chapter 72. 2. In this Chapter, the word "wire" means hot-formed or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Section 74

Copper and articles thereof

Notes:

1. In this Section, the following expressions have the meanings hereby assigned to them:

(a) Refined copper

Metal containing at least 99.85 per cent by weight of copper; or

Metal containing at least 97.5 per cent by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

Table-Other elements

Element Limiting content % by weight

Ag Silver 0.25

As Arsenic 0.5

Cd Cadmium 1.3

Cr Chromium 1.4

Mg Magnesium 0.8

Pb Lead 1.5

S Sulphur 0.7

Sn Tin 0.8

Te Tellurium 0.8

Zn Zinc 1

Zr Zirconium 0.3

Other elements, each 0.3

(b) Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(1) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(2) the total content by weight of such other elements exceeds 2.5 per cent.

(c) Master alloys

Alloys containing with other elements more than 10 per cent by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15 per cent by weight of phosphorus falls in heading 28.53.

Subheading Notes: In this Section, the following expressions have the meanings hereby assigned to them:

(a) Copper-zinc base alloys (brass) Alloys of copper and zinc, with or without other elements. When other elements are present: - zinc predominates by weight over each such other element; - any nickel content is less than 5 per cent by weight (see copper-nickel-zinc alloys (nickel silver)); and - any tin content is less than 3 per cent by weight (see copper-tin alloys (bronze)). (b) Copper-tin base alloys (bronze) Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each such other element, except that when the tin content is 3 per cent or more, the zinc content may exceed that of tin but must be less than 10 per cent by weight. (c) Copper-nickel-zinc base alloys (nickel silver) Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 per cent or more by weight (see copper-zinc alloys (brass)). (d) Copper-nickel base alloys Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 per cent of zinc. When other elements are present, nickel predominates by weight over each such other element.

(?) Parts suitable for use solely or principally with a particular kind of machine or with a plurality of machines of the same heading (including the machines of heading 84.79 or 85.43), are to be classified with the machines of that kind or in heading 84.09, 84.31, 84.48, 84.66, 84.73, 85.03, 85.22, 85.29 or 85.38, as appropriate. However, parts which are equally suitable for use solely or principally with the goods of headings 85.17 and 85.25 to 85.28 are to be classified in heading 85.17, and parts which are suitable for use solely or principally with the goods of heading 85.24 are to be classified in heading 85.29.

(?) All other parts are to be classified in heading 84.09, 84.31, 84.48, 84.66, 84.73, 85.03, 85.22, 85.29 or 85.38, as appropriate, or, failing that, in heading 84.87 or 85.48. 3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function. 4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one heading in Chapter 84 or Chapter 85, the whole is to be classified in the heading appropriate to that function. 5. For the purposes of these Notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

6. (?) Throughout this Schedule, the expression "electrical and electronic waste and scrap" means electrical and electronic assemblies, printed circuit boards and electrical and electronic goods which: (1) have become unusable for their original purpose due to breakage, cutting, or other processes, or are not economically suitable for repair, refurbishment, or renovation to make them fit for their original purpose; and (2) are packed or shipped without the intention of protecting each item from damage during transport, loading, or unloading operations. (?) Mixed consignments of "electrical and electronic waste and scrap" and other waste and scrap are to be classified in heading 85.49. (?) This Chapter does not cover municipal waste as defined in Note 4 of Chapter 38. Chapter 84 Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof Notes: 1. This Chapter does not cover: (?) Millstones, grindstones or other articles of Chapter 68; (?) Machinery or appliances of ceramic material (for example, pumps) and ceramic parts of any machinery or appliances (Chapter 69); (?) Laboratory glassware (heading 70.17); machinery, appliances or other articles for technical use of glass, or parts thereof (heading 70.19 or 70.20); (?) Articles of heading 73.21 or 73.22 or similar articles of other base metals (Chapters 74 to 76 or 78 to 81); (?) Vacuum cleaners of heading 85.08; (?) Electro-mechanical domestic appliances of heading 85.09; digital cameras of heading 85.25; (?) Radiators for articles of Section XVII; or (?) Hand-operated mechanical floor sweepers, not motorised (heading 96.03). 2.

Subject to the operation of Note 3 of Section XVI and subject to Note 1 of this Chapter, a machine or appliance which answers to a description in one or more of the headings 84.01 to 84.24, or of heading 84.86, and at the same time to a description in one or more of the headings 84.25 to 84.80 is to be classified under the appropriate heading of the former group or under heading 84.86, as the case may be, and not under the latter group. (?) However, the following articles are not to be classified in heading 84.19: (1) Germination plant, incubators or brooders (heading 84.36); (2) Grain dampening machines (heading 84.37); (3) Diffusion

apparatus for the extraction of sugar juice (heading 84.38); (4) Machinery for the heat treatment of yarns, fabrics or made-up textile articles (heading 84.51); or (5) Machinery, plant or laboratory equipment, whether or not thermally operated, for the separation of isotopes (heading 84.01). (?) The following articles are not to be classified in heading 84.22: (1) Sewing machines for closing bags or similar containers (heading 84.52); or (2) Office machinery of heading 84.72. (?) The following articles are not to be classified in heading 84.24: (1) Ink-jet printing machines (heading 84.43); or (2) Water-jet cutting machines (heading 84.56). 3. Any machine-tool for working any material which answers to a description in heading 84.56 and at the same time to a description in heading 84.57, 84.58, 84.59, 84.60, 84.61, 84.64 or 84.65 is to be classified in heading 84.56. 4. Heading 84.57 applies only to machine-tools for working metal, other than lathes (including turning centres), which can carry out different types of machining operations either: (?) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres), (?) by the automatic use, simultaneously or sequentially, of different unit heads working on a stationary workpiece (unit construction machines, single station), or (?) by the automatic transfer of the workpiece to different unit heads (multi-station transfer machines). 5. For the purposes of heading 84.62, "slitting line" means a processing line consisting of a combination of an uncoiler, a flattener, a slitter and a recoiler. For flat products, "cut-to-length line" means a processing line consisting of an uncoiler, a flattener and a shear.

6. (?) For the purposes of heading 84.71, the expression "automatic data processing machine" means a machine capable of: (1) Storing the processing programme or programmes and at least the data immediately necessary for the execution of the programme; (2) Being freely programmed in accordance with the requirements of the user; (3) Performing arithmetical computations specified by the user; and (4) Executing, without human intervention, a processing programme which requires modification of the execution by logical decision during the processing run. (?) Automatic data processing machines may be in the form of systems consisting of a variable number of separate units. (?) Subject to subparagraphs (?) and (?) below, a unit is to be regarded as being a part of an automatic data processing system if it meets all of the following conditions: (1) It is of a kind solely or principally used in an automatic data processing system; (2) It is connectable to the central processing unit either directly or through one or more other units; and (3) It is capable of accepting or delivering data in a form (codes or signals) which can be used by the system. Separate units of an automatic data processing machine are to be classified in heading 84.71. However, keyboards, X-Y coordinate input devices and disk storage units which satisfy the conditions of subparagraphs (?) (2) and (?) (3) above are in all cases to be classified as units of heading 84.71. (?) Heading 84.71 does not cover the following when presented separately, even if they meet all the conditions set out in Note 6 (?) above: (1) Printing machines, copying machines, facsimile machines, whether or not combined; (2) Apparatus for the transmission or reception of sound, images or other data, including apparatus for communication in a wired or wireless network (such as a local or wide area network); (3) Loudspeakers, microphones; (4) Television cameras, digital cameras and video camera recorders; (5) Monitors and projectors, not incorporating television reception apparatus. (?) Machines performing a specific function other than data processing and incorporating or working in conjunction with an automatic data processing machine are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings. 7. Heading 84.82 applies, inter alia, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1% or by more than 0.05 mm, whichever is less.

Other steel balls are to be classified in heading 73.26. 8. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose. Subject to Note 2 of this Chapter and Note 3 of Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires,

to be classified in heading 84.79. Heading 84.79 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials. 9. For the purposes of heading 84.70, the term "pocket-size" applies only to machines the dimensions of which do not exceed 170 mm x 100 mm x 45 mm. 10. For the purposes of heading 84.85, "additive manufacturing" (also referred to as 3D printing) means the process of building up physical objects, based on a digital model, by the successive addition, layering and consolidation and solidification of materials (for example, metals, plastics and ceramics). Subject to Note 1 of Section XVI and Note 1 of Chapter 84, machines and appliances which answer to the description in heading 84.85 are to be classified in that heading and not in any other heading of this Schedule. 11. (?) For the purposes of this Note and heading 84.86, the expressions "semiconductor devices" and "electronic integrated circuits" also apply, respectively, to Notes 12(?) and 12(?) of Chapter 85. However, for the purposes of this Note and heading 84.86, the expression "semiconductor devices" also covers photosensitive semiconductor devices and light-emitting diodes (LEDs). (?) For the purposes of this Note and heading 84.86, the expression "manufacture of flat panel displays" covers the processing of substrates into a flat panel. It does not cover the manufacture of glass or the assembly of printed circuit boards or other electronic components onto the flat panel.

The expression "flat panel display" does not cover cathode-ray tube technology. (?) Machines and appliances which are used wholly or principally for the following are also to be classified in heading 84.86: (1) The manufacture or repair of masks and reticles; (2) The assembly of semiconductor devices or electronic integrated circuits; (3) The lifting, handling, loading or unloading of boules, wafers, semiconductor devices, electronic integrated circuits and flat panel displays. (?) Subject to Note 1 of Section XVI and Note 1 of Chapter 84, machines and appliances which answer to the description in heading 84.86 are to be classified in that heading and not in any other heading of this Schedule. Subheading Notes: 1. For the purposes of subheading 8465.20, the expression "machining centres" applies only to machine-tools for working wood, cork, bone, hard rubber, hard plastics or similar hard materials, which can carry out different types of machining operations by automatic tool change from a magazine or the like in conformity with a machining programme. 2. For the purposes of subheading 8471.49, the expression "systems" means automatic data processing machines whose units satisfy the conditions specified in Note 6(?) of Chapter 84 and which comprise at least a central processing unit, one input unit (for example, a keyboard or a scanner) and one output unit (for example, a visual display unit or a printer). 3. For the purposes of subheading 8481.20, the expression "valves for oleohydraulic or pneumatic transmissions" means valves which are specifically used in hydraulic or pneumatic systems for the transmission of "fluid power", where the power source is supplied in the form of pressurised fluid (liquid or gas). Such valves may be of any type (for example, pressure-reducing type, check type). Subheading 8481.20 takes precedence over all other subheadings of heading 84.81. 4. Subheading 8482.40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

?Printed circuits? do not include circuits combined with elements other than those obtained during the printing process, nor do they include individual separate resistors, capacitors, or inductors. However, printed circuits may be fitted with non-printed connecting elements. Thin or thick film circuits comprising passive and active elements obtained during the same technological process shall be classified in heading 85.42. 9. For the purposes of heading 85.36, ?connectors for optical fibres, optical fibre bundles or cables? means connectors which simply mechanically align the ends of optical fibres in a digital line system. They perform no other functions, such as signal amplification, regeneration, or conversion. 10. Wireless infrared remote control devices for television receivers or other electrical equipment (heading 85.43) are not classified in heading

85.37. 11. For the purposes of heading 85.39, the expression "light-emitting diode (LED) light sources" covers the following:

(a) "Light-emitting diode (LED) modules", which are electrical light sources based on light-emitting diodes arranged in an electrical circuit and containing other elements such as electrical, mechanical, thermal, or optical elements. They may also have separate active elements, separate passive elements, or articles of heading 85.36 or 85.42 for the purpose of power supply or power control. Light-emitting diode modules do not have a cap designed for easy installation or replacement in a luminaire and to ensure mechanical and electrical contact.

(b) "Light-emitting diode (LED) lamps", which are electrical light sources containing one or more LED modules and electrical, mechanical, thermal, or optical elements. The distinction between light-emitting diode (LED) modules and light-emitting diode (LED) lamps is that lamps have a cap designed for easy installation or replacement in a luminaire and to ensure mechanical and electrical contact. 12. For the purposes of headings 85.41 and 85.42:

(a) (i) "Semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field or semiconductor-based transducers.

Semiconductor devices may include the assembly of plural elements, whether or not fitted with active or passive devices performing auxiliary functions. For the purposes of this definition, "semiconductor-based transducers" are semiconductor-based sensors, semiconductor-based actuators, semiconductor-based resonators, and semiconductor-based oscillators, which perform an internal function and are capable of converting any type of physical or chemical observable phenomenon or action into an electrical signal, or converting an electrical signal into any type of physical phenomenon or action. In semiconductor-based transducers, all the elements are integrally combined, and materials necessary to enable their construction or function may also be integrally attached. The meaning of the following expressions: (1) "Semiconductor-based" means built or fabricated on a semiconductor substrate, or made from semiconductor materials, manufactured by semiconductor technology, in which the semiconductor substrate or material plays an essential and irreplaceable role in the transducer's function and performance, and its operation is based on semiconductor properties, including physical, electrical, chemical, and optical properties. (2) "Physical or chemical observable phenomena" relate to phenomena such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemical concentration, etc. (3) "Semiconductor-based sensors" are a type of semiconductor device which consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and have the function of detecting physical or chemical quantities and converting them into electrical signals due to changes in electrical properties or displacement of a mechanical structure. (4) "Semiconductor-based actuators" are a type of semiconductor device which consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and have the function of converting electrical signals into physical motion. (5) "Semiconductor-based resonators" are a type of semiconductor device which consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and generate mechanical or electrical oscillations of a predetermined frequency that depend on the physical geometry of those structures in response to an external input. (6) "Semiconductor-based oscillators" are a type of semiconductor device which consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and generate mechanical or electrical oscillations of a predetermined frequency based on the physical geometry of those structures. (ii) "Light-emitting diodes (LEDs)" are semiconductor devices based on semiconductor

material, whether or not electrically interconnected and whether or not fitted with protective diodes, which convert electrical energy into visible, infra-red, or ultra-violet rays.

Light-emitting diodes of heading 85.41 do not incorporate elements for the purpose of power supply or power control.

(b) "Electronic integrated circuits" are as follows:

(i) Monolithic integrated circuits, in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (such as doped silicon, gallium arsenide, silicon germanium, indium phosphide), inseparably associated;

(ii) Hybrid integrated circuits, which combine passive elements (resistors, capacitors, inductances, etc.) obtained by thin or thick film technology and active elements (diodes, transistors, monolithic integrated circuits, etc.) obtained by semiconductor technology, integrally combined for all intents and purposes, intimately or by means of interconnecting cables, on a single insulating substrate (glass, ceramic, china clay, etc.). These circuits may also include discrete components.

(iii) Multi-chip integrated circuits consisting of two or more interconnected monolithic integrated circuits, combined for all intents and purposes in an essentially inseparable manner, whether or not on one or more insulating substrates, with or without leadframes, but without other active or passive circuit elements.

(iv) Multi-component integrated circuits (MCOs): a combination of one or more monolithic, hybrid, or multi-chip integrated circuits with at least one of the following components: silicon-based sensors, actuators, oscillators, resonators, or combinations thereof, or articles classified in headings 85.32, 85.33, 85.41, or inductors classified in heading 85.04, integrally formed into a single body, for all intents and purposes, by means of pins, leads, balls, lands, bumps, or pads on a PCB or other carrier, of a kind used for assembly on printed circuits, like integrated circuits. For the purposes of this definition:

1. "Components" may be discrete, independently manufactured, and then assembled into the rest of the MCO, or integrated into other components. 2. "Silicon-based" means built on a silicon substrate, or made from silicon materials, or fabricated on a die of an integrated circuit.

3. (a) "Silicon-based sensors" consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and have the function of detecting physical or chemical observable phenomena and transducing them into electrical signals due to changes in electrical properties or displacement of a mechanical structure. "Physical or chemical observable phenomena" relate to phenomena such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemical concentration, etc. (b) "Silicon-based actuators" consist of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and have the function of converting electrical signals into physical motion. (c) "Silicon-based resonators" are components consisting of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and generate mechanical or electrical oscillations of a predetermined frequency that depend on the physical geometry of those structures in response to an external input. (d) "Silicon-based oscillators" are active components consisting of microelectronic or mechanical structures, created in the bulk or on the surface of a semiconductor, and generate mechanical or electrical oscillations of a predetermined frequency based on the physical geometry of those structures. For the classification of articles defined in this Note, headings 85.41 and 85.42 shall take precedence over any other

heading of this Schedule, except in the case of heading 85.23, which may cover articles by reference to their function. Subheading Notes: 1. Subheading 8525.81 covers only high-speed television cameras, digital cameras, and video camera recorders having one or more of the following characteristics: - a writing speed exceeding 0.5 mm per microsecond; - a time resolution of 50 nanoseconds or less; - a frame rate exceeding 2,250,000 frames per second. 2. With respect to subheading 8525.82, radiation-hardened or radiation-tolerant television cameras, digital cameras, and video camera recorders are designed or sealed to be operated in high-radiation environments. These cameras are designed to withstand a total radiation dose of at least 50 x 10³ Gy (silicon) (5 x 10⁶ RAD (silicon)) without operational degradation. 3. Subheading 8525.83 covers night vision television cameras, digital cameras, and video camera recorders which use a photocathode to convert available light into electrons for the purpose of increasing the size or quality of the visual image and enabling changes to the visual image. This subheading does not cover thermal image cameras (generally subheading 8525.89). 4.

Chapter 90

Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments and apparatus; parts and accessories thereof

Notes:

1. This Chapter does not cover:

(a) Articles of a kind used in machinery, plant or for other technical purposes, other than those of hard rubber (heading 40.16), leather or composition leather (heading 42.05) or of textile material (heading 59.11);

(b) Supporting belts or other supporting articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section 11);

(c) Refractory goods of heading 69.03; ceramic wares for laboratory, chemical or other technical uses, of heading 69.09;

(d) Glass mirrors or base metal or precious metal mirrors, not optically worked (heading 70.09 or Section 71);

(e) Goods of heading 70.07, 70.08, 70.11, 70.14, 70.15 or 70.17;

(f) Base metal common parts (Section 15), as defined in Note 2 to Section 15, or similar goods of plastics (Chapter 39); however, articles specially designed for implantation in medical, surgical, dental or veterinary sciences are to be classified in heading 90.21.

(g) Pumps incorporating measuring devices, of heading 84.13; weight-operated counting or checking machinery, or separately presented weights for balances (heading 84.23); lifting or handling machinery (headings 84.24 to 84.28); paper or paperboard cutting machines of all kinds (heading 84.41); fittings for machine tools or water-jet cutting machines, for adjusting the work or the tool, of heading 84.66, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not those which are themselves essentially optical instruments (for example, alignment telescopes); calculating machines

(heading 84.70); bulbs or other devices of heading 84.81; machines and apparatus of heading 84.86 (including apparatus for the projection or drawing of circuit patterns onto sensitised semiconductor materials).

(h) Searchlights or spotlights of a kind used for cycles or motor vehicles (heading 85.12); portable electric lamps of heading 85.13; cinematographic sound recording, reproducing or re-recording apparatus (heading 85.19); sound-heads (heading 85.22); television cameras, digital cameras and video camera recorders (heading 85.25); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading 85.26); connectors for optical fibres, bundles or cables (heading 85.36); numerical control apparatus (heading 85.37);

Sealed beam lamp units of heading 85.39; optical fibre cables of heading 85.44;

(i) Searchlights or spotlights of heading 94.05;

(j) Articles of Chapter 95;

(k) Monopods, bipods, tripods and similar articles of heading 96.20;

(l) Capacity measures, to be classified according to their constituent material; or

(m) Spools, reels or similar supports (to be classified according to their constituent material, for example, heading 39.23 or Section 15).

2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:

(a) Parts and accessories which are goods included in any of the headings of this Chapter or of Chapter 84, 85 or 91 (other than heading 84.87, 85.48 or 90.33) are in all cases to be classified in their respective headings;

(b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 90.10, 90.13 or 90.31), are to be classified with the machines, instruments or apparatus of that kind;

(c) All other parts and accessories are to be classified in heading 90.33. 3. The provisions of Notes 3 and 4 to Section 16 apply also to this Chapter. 4. Heading 90.05 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for use with machines, instruments or apparatus of this Chapter or Section 16; such telescopic sights and telescopes are to be classified in heading 90.13. 5. Optical measuring or checking instruments or appliances, which would otherwise be classifiable both in heading 90.13 and in heading 90.31, are to be classified in heading 90.31. 6. For the purposes of heading 90.21, the expression "orthopaedic appliances" means appliances for:

- preventing bodily deformities; or

- supporting or holding organs after illness, operation or injury. Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided they are either (1) made to measure or (2) produced in bulk singly for either foot without the need for matching. 7. Heading 90.32 applies only to:

(a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value stabilised against disturbances, by continuously or

periodically measuring its actual value; and

(b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value stabilised against disturbances, by continuously or periodically measuring its actual value.

CLOCKS AND WATCHES AND PARTS THEREOF

Notes:

1.

This Chapter does not cover: (a) Clock or watch glasses or weights (classified according to their constituent material); (b) Watch chains (heading 71.13 or 71.17, as the case may be); (c) Parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 71.12); however, clock or watch springs are to be classified as parts of clocks or watches (heading 91.14); (d) Bearing balls (heading 73.26 or 84.82, as the case may be); (e) Articles of heading 84.12 constructed to work without an escapement; (f) Ball bearings (heading 84.82); or (g) Articles of Chapter 84 (Chapter 84), not yet assembled together or with other components into a watch movement or into a sub-assembly, or not yet assembled into articles suitable for use wholly or principally as parts of such sub-assemblies. 2. Heading 91.01 covers only watches with cases wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 71.01 to 71.04. Watches with cases of base metal inlaid with precious metal fall in heading 91.02. 3. For the purposes of this Chapter, the expression "watch movement" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a mechanical display which may include a system. The thickness of such watch movements shall not exceed 12 mm and their width, length or diameter shall not exceed 50 mm. 4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.

Provided, however, that articles such as plain rings, bangles, chains, etc., made solely in the form of plain jewellery, shall not be recognized as jewellery for the purposes of sub-clauses (i), (ii) or (iii).

(2) If gold or gold jewellery is imported in excess of the quantities mentioned in clause (1) (a) or (b), the excess quantity shall be confiscated.

(3) For the purpose of customs valuation of gold and gold jewellery brought by passengers, the Department shall, on the 1st and 15th of each month, obtain a price list from the international market and make it available to the customs office.

(4) If a foreign passenger declares to the customs office gold jewellery for personal use up to twenty-five grams for males and fifty grams for females, and silver jewellery up to one hundred grams, in excess of that quantity, with the intention of taking it back upon departure, such jewellery may be allowed entry after examination and upon depositing a security amounting to twenty percent of the value of such jewellery. Upon the passenger's departure, the jewellery may be examined at the customs office and the security deposit may be refunded. If, upon examination, the quality or quantity is found to differ from that declared, action shall be

taken in accordance with prevailing customs law. Provided, however, that a passenger arriving from India for social events including marriage may bring jewellery for his/her own use by declaring it at the customs office, subject to the condition that it will be taken back upon departure.

Provided that a period of less than one year shall not be counted for the purpose of depreciation. (2) Save as provided in sub-clause (1), in the case of vehicles imported personally under partial customs duty exemption for personal use, if such vehicles are to be sold or transferred to another person, for the purpose of levying customs duty, the value shall be determined by deducting depreciation at the rate of ten percent per annum of the residual value (3) For the purpose of Heading 87.02, when calculating the number of seats, regular seats and the driver's seat shall be counted. Provided that the conductor's seat and other additional seats and folding seats shall not be counted. Special Provisions Relating to Goods Imported under Customs Duty Facility: (1) If a person or entity entitled to diplomatic privilege sells or gifts a vehicle, machinery equipment, or goods imported under diplomatic or duty facility after five years have elapsed from the date of import, a sixty percent exemption shall be granted on the customs duty leviable according to Schedule-3.

In the case of such vehicles, machinery equipment, and goods imported under diplomatic privilege or duty facility, when such facility is granted to a person, it shall be granted only once during the period of that person's tenure in Nepal.

(2) In respect of goods imported in the name of a project or contractor for the operation of projects within Nepal, the following shall apply:-

(a) In respect of vehicles and means of transport, including construction machinery equipment:-

(a1) Construction machinery equipment imported in the name of a project operated by the government or private sector, or the concerned contractor, subject to an agreement with the Government of Nepal or a decision of the Government of Nepal, and vehicles and means of transport imported in the name of a government project or a foreign contractor related thereto, or a joint venture of a foreign contractor and a Nepali contractor, shall be allowed temporary import upon taking a bank guarantee for the amount of duty leviable. For such temporary import upon bank guarantee, a master list containing details of goods essential for the project must have been approved by a gazetted officer of the special class of the concerned body or the Chief Executive Officer of the Investment Board Nepal. Provided that, in the case of projects operated with foreign assistance, subject to the conditions mentioned in the agreement, on the basis of a recommendation made by the Secretary of the concerned Ministry or the development partner, necessary construction machinery equipment and vehicles and means of transport for the project may be allowed temporary import on a back-to-back basis with the condition of mandatory re-export after the completion of the project. Goods imported in this manner shall not be sold, donated, or transferred to anyone in Nepal.

(a2) When importing vehicles, means of transport, and construction machinery equipment under sub-clause (a1), the period of stay within Nepal must be mentioned in the declaration form and clearance shall be made accordingly. If it becomes necessary to keep them within Nepal for a period exceeding the period mentioned in the declaration form because the project has not been completed within the stipulated period, approval must be obtained from the concerned body and information about the extension of the project period must be provided to the Department. On that basis, the Department shall inform the concerned customs office and the concerned body.

(a3) When registering vehicles and means of transport imported under sub-clause (a1), they shall be registered in a manner that allows for separate identification, and upon expiry of the project period, such vehicles shall not be renewed.

Vehicles, means of transport, construction machinery, and equipment not re-exported or for which duty is not paid within the specified period shall be confiscated, and an amount equal to the leviable duty from the bank guarantee kept at the time of temporary import shall be credited to revenue.

(a6) Until the goods imported in the name of one project by the concerned contractor are re-exported or duty on such goods is paid, the same contractor shall not import similar vehicles, machinery equipment, and goods for another project.

(b) In respect of goods consumed in a project:-

When recommending to the Ministry for duty exemption on goods consumed in a project operated with foreign loans or assistance and approved by the Investment Board Nepal, a master list containing details of such goods, including the following matters, must have been approved by a gazetted officer of the special class of the concerned body or the Chief Executive Officer of the Investment Board Nepal:-

(d) Even if the unit price of goods falling under the approved master list mentioned in clauses (a) and (b) is up to twenty-five percent less than that mentioned in the master list, such price shall be accepted. If the unit price of goods decreases by more than twenty-five percent, the master list must be amended to adjust such price.

(3) Goods imported under the facility pursuant to clause (2) may only be used in the project for which they were imported. If found to be used elsewhere than the specified project, except in cases approved by the Government of Nepal, in the case of consumable goods, the duty leviable on such goods and a penalty equal to such duty shall be imposed.

In the case of non-consumable goods including vehicles, machinery equipment, such goods shall be confiscated, and if a bank guarantee has been kept for the duty, an amount equal to the leviable duty from such bank guarantee shall be credited to revenue. (4) When making any agreement relating to a project to be operated with foreign assistance after the 1st of Shrawan 2080, no agreement shall be made to exempt customs duty on the import of goods that are adequately produced domestically, such as cement, iron rods, iron pipes and plastic pipes, galvanized iron sheets, and electric cables falling under Heading 85.44, which are consumed in such project. The Ministry may grant exemption from value added tax and excise duty levied on the purchase of domestic products mentioned in this clause by the concerned project. (5) If, after the 1st of Shrawan 2080, the concerned body makes an agreement relating to duty exemption for a project without prior consent of the Ministry, no duty exemption shall be granted in respect of such agreement. (6) A person who provides accurate information about vehicles, means of transport, construction machinery, and equipment for which duty has not been paid under clause (2) or which have not been re-exported within the period specified in that clause, and assists in taking possession thereof, shall be given ten percent of the amount received from auctioning such goods as a reward. 5.
